

模版·汉诺塔问题

```
public class TowerOfHanoi{  
    public static void solveTowerOfHanoi(int n,char from,char to,char aux){  
        if(n==1){  
            System.out.println("把1从"+from+"移动到"+to);  
            return;  
        }  
  
        solveTowerOfHanoi(n-1,from,aux,to);  
        System.out.println("把"+n+"从"+from+"移动到"+to);  
        solveTowerOfHanoi(n-1,aux,to,from);  
    }  
    public static void main(String[] args){  
        int n=5;  
        solveTowerOfHanoi(n,'A','C','B');  
    }  
}
```
