

# 模版·迭代器与比较器接口

```
public interface Iterator<E>{  
    boolean hasNext();  
    E next();  
    void remove();  
    default void forEachRemaining(Consumer<? super E> action){}  
}
```

```
public interface Comparator<T>{  
    public int compare(T o1,T o2);  
    public boolean equals(Object obj);  
}
```
